Manufacture - Assembly - Project Support

Quality implementation every step of the way

The Brief

Our client needed us to build a new machine similar to one they had already but with a few new modifications - we had just 4 weeks to complete the project.

Our customers all have specific needs so we meet with them to fully understand what is required and then we make it happen.

We used existing models from our customer to generate a new design for manufacture.

Producing manufacturing drawings.

Laser fold and fabricate.

*Finishing and assembly,
all within Warren Services.
Delivering a finished working
product in next to no time.*

*Making the finishing
touches to products
before final sign off,
means we have a real
eye for detail.*

*By working closely with our customer
to fully understand their product
requirements we were able to produce
results in timescales that couldn't be
matched anywhere else.*

*The
Result*

By choosing Warren Services our customer was able to get all they needed designed, drawn, manufactured, fabricated, painted and assembled in one place. No need to coordinate all those services and subcontractors because we did it all for them over our two sites.

Start to finish we manage it all for you, allowing you to get on with what you need to in your business, safe in the knowledge that we are looking after your products at every stage of manufacture.
